Denver Headache and Spine Center Partners to Offer Premium, Collaborative Care for Personal Injury Patients

Littleton, Colorado, February 20, 2019—Denver Headache and Spine Center has announced its alliance with Ament Headache Center in opening a game-changing, modern, premium care facility for personal injury victims. Housing neurological, chiropractic, vestibular, and vision therapy in one location, this facility holistically addresses unresolved pain such as headaches, migraines, vertigo, and concussion. This integrated medical center was designed and built to remove the limitations that conventional treatments and commercial insurance oftentimes place on personal injury patients.

This collaboration is not only unique in the collective in-house medical services it offers, but also in its approach to payment. Providers work closely with select personal injury law offices to provide patients immediate care without the necessity of producing large out-of-pocket payments or contracting with a finance company. Payment for service is received only after a patient's case is settled. According to Dr. James, "We believe that quality of care should not be determinant on insurance coverage or the patient's financial means, or that the length of treatment should be dictated by insurance companies rather than the patient's progress. Our collaborative approach allows us to collectively treat all of the systemic issues until they are fully addressed, improving the lives of our patients without saddling them with debt."

Patients matriculate into this network through initial consultations with Dr. James or Dr. Ament. The office is centrally located at 1720 Bellaire Street, Suites 200 and 201, in Denver, Colorado.

About Denver Headache and Spine Center: Dr. James is a board-certified atlas orthogonal chiropractor and founder of Denver Headache and Spine Center, located in Littleton, Colorado. He can be reached at 303-795-7530 or via www.denverheadache.com.

About Ament Headache Center: Neurologist Dr. Michael Ament specializes in headache and migraine pain and can be contacted at 303-834-5677 or through his website, www.amentheadachecenter.com.
